EDUCATION

McGill University

BSc. Computer Science (AI Concentration)

Montréal, QC

Aug. 2023 – Dec. 2027

EXPERIENCE

PointClickCare

Software Engineering Intern (Full Stack)

Mississauga, ON

May 2026 – Aug. 2026

- Saved ~**50 minutes per avoided build failure** by engineering a self-updating **SonarQube** quality-gate skill that flags errors pre-build, alongside an automated **Claude Code** workspace bootstrap harness standardized across **23 repos**
- Engineered a **React/TypeScript micro-frontend** from scratch using Vite and module federation with typed API contracts and mock data, achieving **100% test coverage** and unblocking independent frontend development
- Redesigned a **Java/Spring Boot** clinical drill-down API using a **3-source UNION SQL query**, and fixed a cross-facility data-exposure vulnerability by adding missing RBAC validation
- Fixed intermittent 500 errors across financial APIs by **forwarding JWT claims** correctly, and stabilized CI pipelines by writing automated **JDBC test-data resets**

Software Engineering Intern (Full Stack)

May 2025 – Aug. 2025

- Built **4 end-to-end React features** and a **Java/Spring Boot filter API** for clinical dashboards used by **400+ partners**, processing **1.4M+ resident records** with optimized SQL queries
- Developed **reusable Material UI components** for an internal design system, adding full state coverage, Storybook documentation, and **keyboard-accessible focus management**
- Fixed clinical workflow logic to correctly surface past-due assessments, and load-tested **12 production Java services** with **k6** and **Grafana** to identify and fix latency bottlenecks

Intact Financial Corporation

Software Engineering Intern (DevOps Platform)

Montréal, QC

Jan. 2025 – Apr. 2025

- Built and owned a **centralized error-handling service** supporting **30+ Java services** used by internal development teams
- Improved **CI/CD reliability** by enhancing Jenkins pipelines and GitHub Actions workflows, and integrated **automated vulnerability scanning** to reduce manual security review overhead
- Refactored and standardized **40+ legacy services** to comply with updated deployment and security conventions

360insights Inc.

Software Engineering Intern (MDM Platform)

Whitby, ON

May 2024 – Dec. 2024

- Eliminated routine **manual QA** by building a **CI/CD testing pipeline** with GitHub Actions and Python
- Increased automated test coverage from **30% to 90%** by authoring **100+ unit and integration tests**

PERSONAL PROJECTS

Barline - 2025 CodeJam Best UI/UX Winner | *Three.js, Supabase, FastAPI, Gemini, Docker, AWS*

- Built a 3D interactive web app in 36 hours that won Best UI/UX, programming custom liquid handling, procedural garnishing, and spatial sound effects using **Three.js**
- Created a real-time conversational agent via WebSockets and FastAPI, backed by a custom RAG pipeline and **Google Gemini** using semantic chunking for tailored recommendations
- Set up automated data embedding pipelines using Supabase edge functions and Dockerized cron jobs, deploying the full stack on **AWS EC2 and Vercel**

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, Java, Python, SQL

Frameworks & Libraries: Node.js, React, Spring Boot, FastAPI, Material UI (MUI), Vite, TanStack Query, Three.js

DevOps & Tools: Docker, AWS, GitHub Actions, Jenkins, SonarQube, pnpm, Supabase

Testing/Monitoring: k6, Grafana, Prometheus, Jest, JUnit

Databases: PostgreSQL, MySQL
