EDUCATION

McGill University

BSc. Computer Science (AI Concentration)

Montréal, QC

Aug. 2023 – Apr. 2027

Relevant Coursework: Algorithms and Data Structures, Operating Systems, Software Design, Programming Languages and Paradigms, Applied Machine Learning

Certifications: B2 French - FRSL 321

EXPERIENCE

Software Engineering Intern (Full Stack)

May 2025 – Aug. 2025

PointClickCare (Return Offer Extended)

Mississauga, ON

- Built **4 end-to-end React features** powering dashboards used by **400+ partners across 30K+ long-term care providers**
- Delivered a client-facing **missed-entries dashboard**, improving data visibility for clinical and admin users
- Processed **1.4M+ resident records** through optimized Java backend logic to support high-volume reporting workflows
- Load-tested **12 production Java services** using k6 and Grafana, identifying latency bottlenecks and improving API reliability
- Developed **reusable Material UI themes and components** for a rebrand, accelerating feature delivery and enforcing design consistency

Software Engineering Intern (DevOps Platform)

Jan. 2025 – Apr. 2025

Intact Financial Corporation

Montréal, QC

- Built and owned a **centralized error-handling service** supporting **30+ Java services** used by internal development teams
- Improved **CI/CD reliability** by enhancing Jenkins pipelines and GitHub Actions workflows
- Integrated **automated vulnerability scanning and dependency updates**, reducing manual security review overhead
- Refactored and standardized **40+ legacy services** to comply with updated deployment and security conventions

Software Engineering Intern (MDM Platform)

May 2024 – Dec. 2024

360insights Inc. (Internship Extended into Fall)

Whitby, ON

- Eliminated routine **manual QA** by building a **CI/CD testing pipeline** with GitHub Actions and Python
- Increased automated test coverage from **30% to 90%** by authoring **100+ unit and integration tests**
- Built custom **Java tooling** to extract and document cloud-based MDM data models (Reltio)
- Improved **developer onboarding and cross-team integrations** by standardizing MDM documentation workflows

PERSONAL PROJECTS

Barline - 2025 CodeJam Best UI/UX Winner | Docker, Three.js, RAG, React, PostgreSQL, FastAPI, AWS

- Built an **interactive 3D web experience** that lets users explore and save custom cocktail recipes in real time
- Designed and implemented a **stateful conversational backend** with real-time streaming responses
- Developed a **retrieval-augmented generation (RAG) pipeline** to generate personalized cocktail recommendations using vector search
- Implemented **secure authentication, persistent user libraries**, and WebSocket-based real-time updates
- Deployed the full stack using **Docker, AWS EC2, and Vercel**

TECHNICAL SKILLS

Languages: Java, Python, TypeScript, JavaScript, SQL

Frameworks: React, Spring, FastAPI

DevOps and Cloud: Docker, AWS, GitHub Actions, Jenkins

Testing/Monitoring: k6, Grafana, Prometheus

Databases: PostgreSQL, MySQL
